SUMMARY

B.Tech CSE student at VIT Vellore with experience in data engineering, analytics, and cloud platforms through internships at MSD Pharma and Olam Agri. Certified Databricks Data Engineer Associate with hands-on experience in building ETL pipelines, data transformation, and dashboarding using Python, SQL, Snowflake, and Power BI. Developed patent-published IoT systems and AI-based applications.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

GPA: 8.56

Sep. 2022 – Jun 2026

Vellore, TN

- **Coursework:** SQL, Python, C/C++, Java, HTML, JavaScript, Data Structures and Algorithms, AI and ML. Used R, ORCAD, Keil uVision5, and MATLAB

EXPERIENCE

MSD Pharmaceuticals

Digital Human Health Intern

Jan. 2026 – Jun. 2026

Hyderabad, TG

- Built and maintained solutions for campaign performance tracking and new products launch pipeline, improving stakeholder decision-making
- Designed and optimized data pipelines and transformations for healthcare and business datasets using Dataiku.
- Performed data validation, quality checks, and documentation across multiple data systems; collaborated on analytics and automation initiatives using Databricks, AWS, PowerApps, and GitHub

Olam Agri

IT Intern

Jun. 2025 – Jul. 2025

Chennai, TN

- Built ETL workflows in Snowflake for data extraction, transformation, and KPI reporting; developed Power BI dashboards for business insights
- Delivered data-driven reports and presentations to stakeholders and leadership

National Small Industries Corporation (NSIC)

Software Engineering Intern

May 2024 – Jul. 2024

Hyderabad, TG

- Developed a fraud detection system using Python, Pandas, PyCharm, and SQL; performed data preprocessing and anomaly detection on transaction datasets.

PROJECTS

IoT-Enabled Adaptive Street Lighting - Patent Published: Built patent-published (Pub. No. 202541131650) IoT system with Raspberry Pi, MQTT, Python; used YOLOv5 for traffic detection and OpenWeather for 35% energy savings.

Wearable System for Visually Impaired Assistance: Developed ESP32 wearable with TensorFlow Lite, OpenCV, YOLO for real-time object detection and haptic navigation; achieved 92% accuracy in low-light via edge ML.

Bomb Detection Rover with ROS Simulation: Designed Arduino rover (metal detectors) with Gazebo/ROS Python/C++ simulation; integrated computer vision for threat mapping and autonomous navigation.

Shuttlespot - VIT Shuttle Tracking: Built Node.js/Socket.io web app with Google Maps API, MongoDB; GPS-tracked shuttles for 2K+ students, cutting wait times 25% via ETA prediction.

SKILLS AND CERTIFICATIONS

- Databricks Data Engineer Associate - [link](#)
- Dataiku Core Designer - [link](#)
- Oracle Cloud Infrastructure 2025 Foundations Associate - [link](#)
- Career Essentials in Generative AI by Microsoft and LinkedIn - [link](#)
- Java Basic certification from HackerRank - [link](#)
- Technical Skills: SQL, Python, Java, C/C++, Data Structures and Algorithms | Data Engineering: ETL, Data Pipelines, Data Modeling, Data Analytics | Tools: Databricks, Snowflake, Power BI, Dataiku, AWS | Web: HTML, CSS, JS, Node.js, React, REST APIs | Other: Docker, CI/CD, Git, OOP
